ABOUT US

Resolute Forest Products is a leading producer of a diverse range of wood, pulp, tissue and paper products, which are marketed in 60 countries. The company operates some 40 facilities, as well as power generation assets, in the United States and Canada and has third-party certified 100% of its managed woodlands to internationally recognized sustainable forest management standards.

Resolute Forest Products' world-class deinking facility on the Menominee River produces 100% recycled bleached kraft pulp marketed under the Lighthouse Pulp brand. The mill's pulp, which is valued for its high quality and superior performance, is used in a wide variety of paper products to replace virgin fiber, including coated and uncoated paper, tissue, and specialty and packaging applications.

The mill's central location in Michigan allows for easy shipment to U.S. and Canadian customers.

Supporting Sustainability

The Menominee pulp mill is committed to sustainability and has undertaken multiple initiatives:

- 100% of the mill's production is recycled bleached kraft (RBK) pulp, which is a sustainable alternative designed to replace virgin fiber in a variety of paper applications, upholding the same demanding performance specifications.
- Mill employees achieved two million consecutive hours without a single, recordable injury in 2022, a feat dating back 10 years. For every 250,000 injury-free hours, Resolute rewards employees with \$5,000 or more to donate to local organizations. Thanks to the mill's safety performance since 2012, \$100,000 has been donated locally.

The Menominee operation also:

- recycles or reuses fluorescent light bulbs, batteries, antifreeze, oil and scrap metal;
- runs a program to recycle electronics, such as phones, computers, cameras, printer cartridges and printers;
- provides bioresiduals from the manufacturing process to individuals in the states of Michigan and Wisconsin for applications in agriculture, forestry and landscaping; and
- has instituted the conversion of lift trucks from propane fuel to biodiesel fuel.
