Re: Phishing Emails

We have been informed that a number of our customers have received phishing emails from scammers pretending to work for Resolute Forest Products.

We take information security very seriously and ask that you also be vigilant in order to prevent fraud and to help protect our common interests.

Here are a few precautions to take:

- Confirm the sender’s identity before replying to email requests and before opening attachments or clicking on links, even if they appear to come from a legitimate source.
- Consult your Information Technology department about any phishing attempts.
- Call us to validate communications originating from Resolute. Here is an example of a fraudulent email request. (Note the misspelling of Resolute in the email addresses.)
